CARE & MAINTENANCE - see separate sheet supplied or visit www.itsagoal.net for additional copies. Our goalpost if used correctly will last many years. We do also offer a full spare part service and if your goals need refurbishment this can be arranged.

NOTE - The Plastic button on the stanchion elbow is designed to be tight fitting, push in and out to warm up and make pliable. This makes it easier to insert and lock to part Q. Once connected this part stays in place, permanently.

STEP BY STEP NET FITTING

STEP 1

Open net and check the lengths of a and b correspond with the diagram below.

STEP 2

With the net the correct way round lift the net onto the goalpost frame. This is easier with two people.

NOTE: If your net does not fit the first time, you may be fitting it to the goal frame upside down i.e. that is to say the net from the crossbar to the floor (a) is longer than the length of the net to the bottom of the upright (b)

STEP 3

Attach the corners first, where the upright posts meets the crossbar as shown. Then attach the net to the post using the Arrow head net fixings on crossbar and uprights.

STEP 4

Using the large net ties tie the net to the ground side frame back ground frame.

STEP 5

Using the small net ties attach the net down the back of the sloping back net supports as shown to the posts as shown.

OPTIONAL - STANCHION TIES

STEP 6

NET CORD - ROOF TO THE NET To help define the roof of the net Tie the cord to one side and pull the net chord tight and wrap neatly down and around the stanchion section.

If you are regularly attaching or detaching the net then apply coloured tape to the roof corners of net to help identify the roof area.

DO NOT THROW THE LOCKING PINS AWAY

ARROW HEAD NET FIXING

Insert Arrow Head into holes on posts

Push locking pin down centre of Arrow Head

Ensure locking pin is inserted fully in the posts

REMOVABLE NET TIES

ENSURE THAT YOU TIGHTEN THE NET TIE AROUND THE NET-CORD (no more than 340mm apart)

Ensure the teeth of the Net tie are facing you (see step 1). Loop the Net Tie around the Net Cord and slide the end into the horizontal slot and pull tight onto Net Cord (see step 1 - 2).

The vertical slot of the Net Tie is used to secure the net to the post. Loop the Net Tie around the post and insert through vertical slot and twist to lock. (steps 3 - 5). Any excess Net Tie can loop back into the vertical slot. This will also secure the net tie in a fixed position (steps 6 - 8). If Net Ties are to be removed after use then do not loop back into vertical slot.

Smaller net ties are ideal to attach nets to the side frames and the back net support tubes. These are useful when you leave your nets attached to the goals at all times.
