Goalpost Slot Net Fixing

A net fixing that works on most aluminum goalposts that have a slot on the rear of the posts. This net fixing can be left in place in the slot on the goal extrusion or can be twisted out and left attached in position on the net.

To attached the net turn the net fixing upside down and lay it into the slot with the opening facing up. Do this with goal post extrusion laid on the ground. The two lugs on the top of the fixing will hold the fixing clip firmly in the goalpost slot upside down to enable the net to be pushed through the opening on the back of the fixing.

This is a unique design feature that makes it easier to insert the net inside the fixing compared to other similar types of net fixings. Much easier to fit than other similar net fixings.

Fitting Instructions

To help define the roof of the net. Tie the cord to one side and pull the net chord tight and wrap neatly down and around the stanchion section.

If you are regularly attaching or detaching the net then apply colored tape to the roof corners of net to help identify the roof area.

The roof edges should be placed on the top stanchions of the goal frame.

◀ **SQUARE MESH** Net is cut to shape. Simply throw over the frame and fit each end onto top stanchion by securing on each corner of crossbar.

NOTE: If your net does not fit the first time, you may be fitting it to the goal frame upside down i.e. that is to say the net from the crossbar to the floor (a) is longer than the length of the net to the bottom of the upright. (b)

SMALLER STANCHION NET TIES

Smaller net ties are ideal to attach nets to the side frames and the back net support tubes. These are useful when you leave your nets attached to the goals at all times as shown on the diagram to the left. (Diagram A).

ANCHORING YOUR GOAL ON GRASS - POSITION YOUR GOAL ON A LEVEL PLAYING SURFACE. PLACE THE MULTI-SURFACE ANCHOR OVER EACH SIDE OF THE GROUND FRAME (POSITIONS SHOWN) HAMMER THE PEGS THROUGH THE HOLES ON THE ANCHOR DOWN UNDER THE FRAME INTO THE GRASS. ADDITIONAL ANCHORS OR LARGER PEGS CAN BE PURCHASED FOR USE ON SOFT GROUND OR SAND. ANCHORS WITH EXTRA BOLTS CAN BE USED FOR HARD SURFACES SUCH AS TARMAC. COUNTER BALANCE WEIGHTS CAN ALSO BE USED (SUPPLIED SEPARATELY).

OPTIONAL - STANCHION TIES

OPTIONAL - NET TIES

LONGER GROUND PEGS ARE AVAILABLE SEPARATELY.

STANDARD
200mm

SOFTER GROUND
300mm

Longer pegs are to be used on sandy or soft ground earth. A risk assessment of soil conditions suitability should be carried out when anchors are to be used.

GROUND PEG REMOVAL

USE THE HOOK ON THE END OF THE RED GROUND PEG TO REMOVE PEGS FROM THE GROUND OR USE A CLAW HAMMER FOR PEGS THAT ARE DIFFICULT TO REMOVE.

THIS METHOD SECURELY ANCHORS YOUR GOAL DOWN ON TARMAC
